

## Experience

---

### EPAM

Frontend Engineer

Princeton, NJ, USA (Remote)

March 2024 – Present

- Migrated Angular & Material apps from v13 to v18, enhancing maintainability and performance.
- Refactored private libraries and apps to improve reusability and adherence to best practices.
- Added unit, integration, and E2E testing using Jest, Testing library and Storybook.
- Performed code reviews and implemented Angular signals for reactive performance improvements.
- Collaborated using Azure DevOps and Jira in the healthcare domain.

### Byte Factory

Principal Frontend Engineer

Madrid, Spain (Remote)

November 2023 – March 2024

- Led a frontend team through the refactor of Angular components, services, directives, and reactive forms.
- Mentored junior and mid-level developers to improve technical skills and code quality.
- Implemented secure authorization and authentication layers.
- Delivered features using Angular 16, RxJS, NgRx, and BFF/API architectures.
- Ensured test coverage through unit and integration testing; coordinated via Jira and GitLab.

### Double Nines

Frontend Engineer

Florida, USA (Remote)

June 2022 – November  
2023

- Designed and developed a private component library based on Kendo, integrated with Storybook and tests.
- Led a frontend team building Angular apps (v13–15) and micro frontends using Module Federation.
- Implemented state management with NgRx and authentication with Okta.
- Coached junior developers; contributed to logistics product design and delivery

### AquivaLabs

Frontend Developer

Florida, USA (Remote)

January 2022 – May 2022

- Maintained and bug-fixed Angular 8 application with Material and NgRx.
- Wrote unit tests and developed new feature components.
- Contributed to insurance-based platform with high stability requirements.

### Cognizant Softvision

Frontend Engineer

Buenos Aires, Argentina (Remote)

November 2020 – December 2021

- Led frontend teams for Human resources and online payment platforms using Angular 9+, Material, and NGXS
- Conducted Angular technical interviews and served as main code reviewer
- Developed a three.js integration for 3D interfaces and performed Jasmine unit testing
- Designed user and payment management solutions; utilized SCRUM methodologies

### Globant

Frontend Developer

Córdoba, Argentina (on-site)

August 2018 – November 2020

- Contributed to frontend projects for a legal and tax client (Ernst & Young) using Angular 8–11

- Reviewed code, coached juniors, and authored internal frontend best practices guide
- Implemented unit tests with Jest and E2E tests with Selenium
- Created interactive data visualizations using D3.js.
- Managed tasks and deployments with Jira and Azure in agile environments (Scrum and Kanban)

## Leadership & Activities

---

### EPAM

Princeton, NJ, USA

Frontend Engineer

March 2024 – Present

- Advocated for modern Angular practices during migration and modularization of monolith application.
- Promoted code quality and performance by leading code reviews across teams and mentoring peers in enterprise architecture
- Collaborated in cross-team initiatives to unify frontend standards in the healthcare domain

### Double nines

Florida, USA

Frontend Developer

June 2022 – November 2023

- Led a distributed frontend team through the design and implementation of a scalable micro-frontend architecture using Webpack Module Federation.
- Mentored junior frontend developers and established internal standards for development.

### Cognizant Softvision

Buenos Aires, Argentine

Frontend Developer

November 2020 – December 2021

- Conducted technical interviews for Angular positions; influenced hiring decisions with structured technical evaluations
- Helped define Angular role requirements and evaluation criteria for the recruitment team

### Globant

Córdoba, Argentine

Frontend Developer

August 2018 – November 2020

- Defined and documented frontend best practices adopted by multiple project teams
- Coached junior developers and led Angular workshops for internal upskilling
- Represented the frontend team in project planning with clients in the legal and tax sectors

### Open Source – Phalcon Framework

Contributor & Spanish documentation maintainer

2017-2018

- Wrote official Spanish documentation
- Improved unit test coverage, and proposed architectural improvements
- Helped expand adoption of the framework in Spanish-speaking developer communities.

## Skills & Interests

---

- **Learning:** Nx Certification, Astrojs, NestJs.
- **Language:** English Advanced, Spanish Native
- **Interests:** Family, Friends, Travel, Books, Cooking, Swimming, Cycling

Education & Certification

---

Mid-Level Angular Developer	April 15 <sup>th</sup> , 2025
<a href="#">Certificates.dev</a>	
Angular Performance Optimization Techniques	May 2025
Non-Relational Databases: MongoDB	October 2024
Web Accessibility for Developers	September 2024
National Technological University	Córdoba, Argentina
Information systems engineering.	2002-2006
Catholic University of Córdoba	Córdoba, Argentina
Information systems engineering.	2000 – 2001
